

A clear statement!

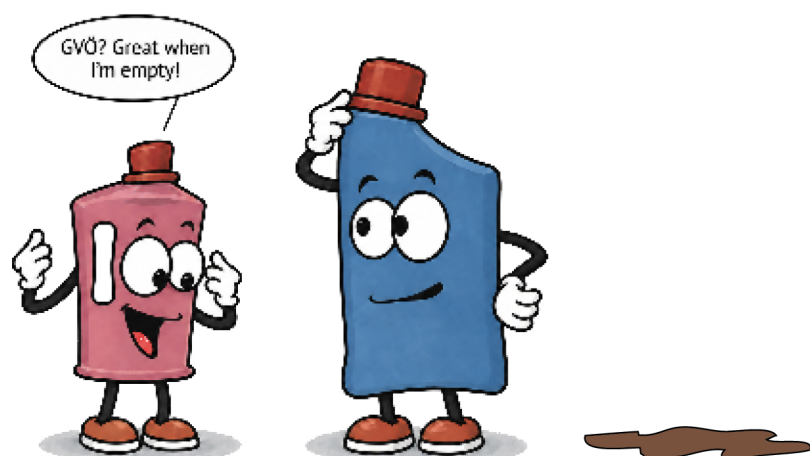

- ☒ **emptied of residues**
- ☒ **emptied**
- ☒ **undamaged**
- ☒ **with original label**

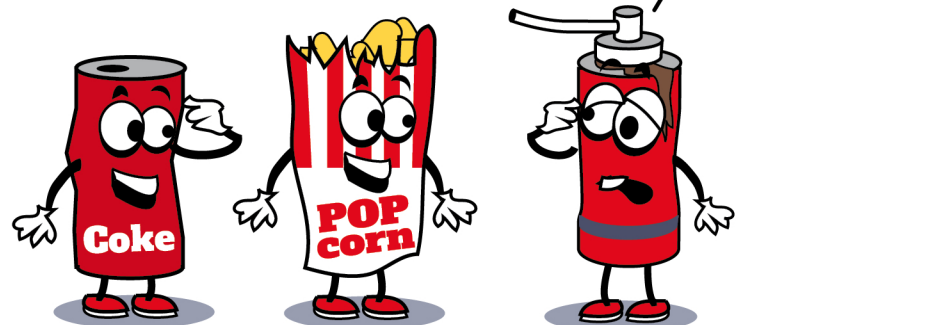

Collection - good to go:

- » At least 4 units (bags or barrels)
- » Don't forget the collection point stickers
- » Close the full GVÖ bag tightly and store it horizontally on an oil-proof surface until collection
- » Request new collection bags from the driver
- » Have the collection order receipted and keep it as proof

Must not be in there:

- » Waste oil residues (containers must be emptied of any residues!)
- » Aerosol cans of all types
- » Non-industry-specific packaging (e.g. from foods, paints, pesticides, other chemicals)
- » Other waste (e.g. oil filters, cleaning rags, batteries, spark plugs, wood, paper products foils, glass, foods).
